PREFACE

Statistics in this publication include bulk steamer, ocean barge, ferry, and plane unloads of most agricultural products from sources outside the State and from the outlying islands, as well as marketings from the island of Oahu. Although direct imports made by the Armed Forces are excluded, quantities sold to commissary stores and sales to the Armed Forces by local dealers are included. Supplies of fresh fruits and vegetables from the State include quantities for fresh market as well as processing, and also out-shipments from the State. Several items of minor importance are excluded and taro for poi manufacture is grouped with miscellaneous commodities. Marketings of poultry products include those from commercial producers with flocks of 100 or more birds; fluid milk production data are from farms with herds of 10 or more head; marketings of beef and swine products are from total slaughter figures. Unload data on meats do not include meats in any processed form.

Explanation of Data in Summary Tables

Fruits and vegetables of minor importance were omitted in Table 1; the quantities given include only those commodities listed in Table 1, page 9. Data generally have been rounded to thousands of pounds, except for eggs and livestock. Dressed poultry data are on an eviscerated basis for easier comparison of quantities received from the several sources. Oahu slaughter of hogs includes animals imported from the U.S. Mainland as well as unloads from the outer islands, and therefore, does not signify that all hogs slaughtered originated on Oahu farms. Cattle and sheep slaughter include animals raised on the neighbor islands.

In the index charts, the year 1950 has been selected as a base because it was least affected by factors that would tend to distort the normal flow of supplies.

ACKNOWLEDGEMENT

The Federal-State Market News work was made possible through the cooperation of the Agricultural Marketing Service, United States Department of Agriculture, and the Hawaii State Department of Agriculture. The Department of Agriculture gratefully acknowledges the assistance of all those who contributed information. Steamship, barge, ferry, and air transportation companies furnished the unload data; records of Oahu truck receipts were obtained from wholesalers.

5-YEAR SUMMARY OF HONOLULU MARKET SUPPLIES

Fresh and Frozen Fruits and Vegetables

The Honolulu market supplies of fresh fruits and vegetables for 1962 totaled nearly 111 million pounds, a decrease of 5.6 million pounds, or 5 percent under 1961 supplies. Both imports and state origin contributed to the appreciable amount of decrease. In 1962, total imports decreased 4.7 million pounds or 7 percent and supplies of state origin were down 0.9 million pounds or 2 percent under 1961 receipts.

Although the population has been consistently on the upward trend, total supplies of fresh fruits and vegetables for 1962 were 4 percent below the 5-year average for the period, 1958-1962.

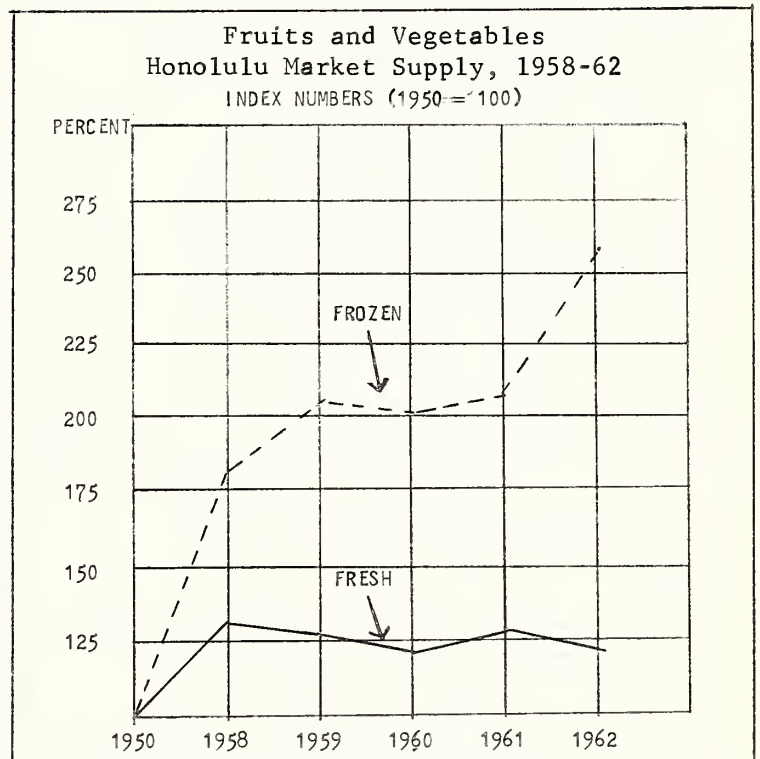

Over the 5-year period, in-shipments of fresh fruits and vegetables from the U. S. Mainland averaged 54 percent and from foreign, 1 percent. The state produced 45 percent of the total Honolulu supply; the island of Oahu contributed the most; however, combined Honolulu receipts from the neighboring islands averaged 23 percent compared with Oahu, 22 percent.

In 1962, in-shipments of frozen fruits and vegetables totaled 3.1 million pounds, a substantial increase of 25 percent over 1961, 622 thousand pounds more than the previous year. Probable reasons for the increase in marketings of frozen products are convenience, less wastage, and moderate prices compared with some of the fresh produce.

Selected Dairy Products and Oleomargarine

Oahu milk producers marketed 108.3 million pounds of fluid milk in 1962, an increase of about 5 percent over 1961. Aside from the year 1959, milk marketings have increased steadily.

Although the lack of information on canned and dried milk imports obscures the overall dairy product consumption pattern, available data seems to indicate an upward trend. In-shipments of butter, cheese, and oleomargarine showed an increase above the

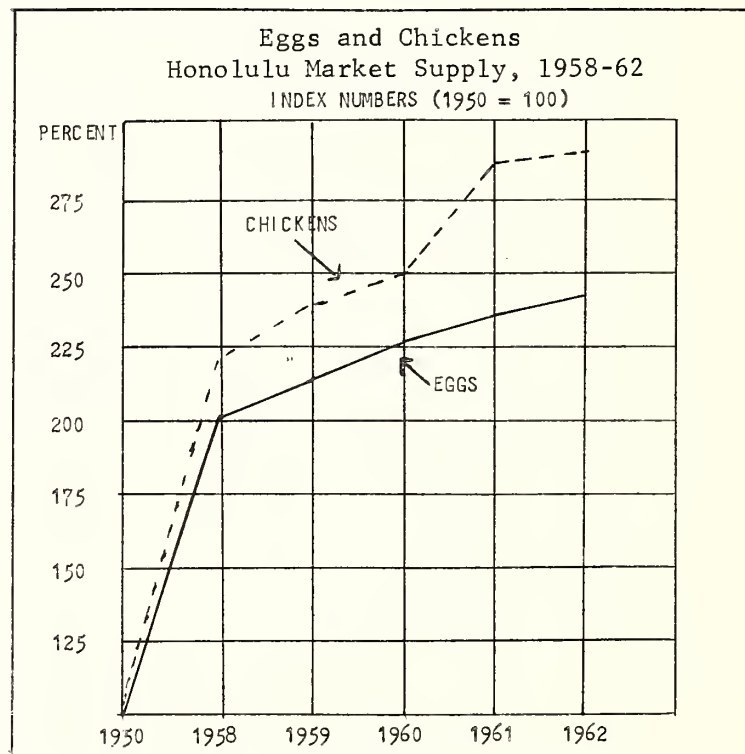

5-year average; cheese rose nearly 16 percent, oleomargarine, 12 percent, and butter, 7 percent. However, only cheese gained continuously during the 5-year period of 1958-1962.

Poultry Products

Eggs: The total supply of fresh eggs has been on the upward trend steadily for the last 5 years. The total receipts of eggs in 1962 amounted to 393 thousand cases (30 dozens), an increase of 3 percent over 1961. In comparison with other commodity farmers, the Hawaiian egg poultrymen maintained a commendable high average of 84 percent of the total supply for the past 3-year period of 1960-1962. Conversely, as the state marketings increased, the imports decreased successively during the same duration.

In 1962, the state egg producers marketed approximately 15 thousand cases or 5 percent more than 1961. Egg output from neighboring islands increased by 21 percent while egg output from Oahu increased slightly less than 1 percent from a year ago.

Poultry Meat: The total supply of poultry meat in the Honolulu market in 1962 amounted to 10.2 million pounds, a slight increase of about 1 percent over the previous year. For the first

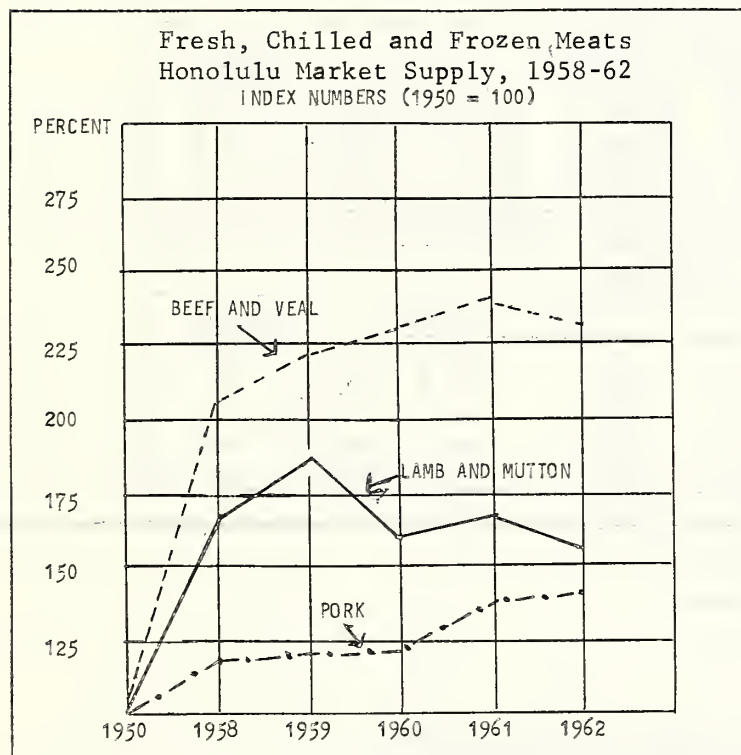

time during the 5-year period of 1958-1962, the continuous upward trend of imports from the U. S. Mainland was disrupted although the total supply continued on an upward trend. The decrease of 62 thousand pounds of poultry meat from the U. S. Mainland was absolved by Oahu poultry meat producers which made an appreciable gain of 149 thousand pounds or 4 percent. Still, state producers contributed a mere 41 percent of the total supply.

Red Meats

A total of 53.2 million pounds of fresh, chilled, and frozen red meats were marketed in Honolulu in 1962. This represented a decrease of 1.3 million pounds or approximately 2 percent less than 1961. Of the decrease of red meats, imports from the U. S. Mainland accounted for 988 thousand pounds, state supplies, 250 thousand pounds,

and in-shipments from foreign sources, 16 thousand pounds; however, only pork showed an increase of 425 thousand pounds. Beef and veal constituted the largest volume of red meats with 68 percent; pork recorded 30 percent; and lamb and mutton, the remainder of 2 percent.

Beef and Veal: In 1962, marketings of beef and veal totaled 36.4 million pounds, 1.6 million pounds less than in 1961. The upward trend in total supplies of beef and veal that was evident during the past years was broken. However, compared with the 1950 base, the volume was up 131 percent. The state furnished 46 percent, the U. S. Mainland, 28 percent, and direct in-shipments from foreign countries, 26 percent.

During the 5-year period of 1958-1962, state supplies of beef and veal remained rather constant with only minor fluctuations from the 5-year average of 16.6 million pounds; however, average imports from foreign countries for the 5-year period was substantially above 1958, a difference of 2.3 million pounds or 39 percent.

Pork: Oahu hog raisers provided only 6.4 million pounds or 41 percent of the total Honolulu market supply of fresh pork in 1962, the lowest during the 5-year period. To meet the market requirements, imports from both the U.S. Mainland and foreign countries

were increased. Of the total imports of 9.3 million pounds of chilled and frozen pork, 95 percent or 8.9 million pounds derived from the U. S. Mainland and 5 percent or 0.4 million pounds from foreign sources. In 1962, foreign imports increased 321 percent over 1961. The unusual gain was the result of domestic shipping strike.

Lamb and Mutton: The total supply of lamb and mutton amounted to 1.2 million pounds, a decrease of 6 percent in 1962 from 1961. In 1962, mainland imports represented 51 percent and foreign imports contributed 47 percent, totalling 98 percent of the total supply. The Hawaiian sheep ranchers marketed the remaining 2 percent of the total supply.
